detego EXPRESS

RF-iT™
Solutions

Operate RFID the easy way!

detego® EXPRESS is your cost effective and professional entry to the RFID technology. Choose your favourite RFID devices and conveniently connect to your IT backend system.

Advantages

- ▶ A variety of applications for production, logistics or inventory management
- ▶ Cheap entry into the RFID technology
- ▶ Simple RFID device connection
- ▶ **detego® EXPRESS** always appropriate to your application

detego® stands for leading RFID solutions along the entire supply chain, and sets standards in terms of flexibility, scalability, technology and functionality.

The **detego® SUITE** includes additional versatile modules for production, distribution and shop as well as professional services for RFID and Auto-ID.

Wide variety of supported devices

All major RFID devices (Motorola, Kathrein, Sirit, Impinj, Intermec, Texas Instruments and many more) are supported for a variety of technologies (UHF, HF, LF, barcode) directly or on request.

With the connection to simulation devices, you can run **detego® EXPRESS** even without a physical device.

Interfaces to the IT backend system

Through a series of interfaces (Oracle, MySQL, MS SQL, OLE DB, ODBC, HTTP request, File, Web-Service) defined data (ID, timestamp, location) are provided by **detego® EXPRESS** for your IT backend systems (SAP, Navision, Sage and numerous others). Other interfaces such as message queuing and TCP/IP Sockets are available on request and can quickly be implemented.

Effective visualization

The Verification Client is used for easy visualization of your RFID data and is provided with its own download link as an add-on to **detego® EXPRESS**.

Four weeks evaluation for free

Select an RFID reader and an interface to the IT backend system and download **detego® EXPRESS** for your chosen combination. After the evaluation period you will receive details for an affordable unlimited license, which you can obtain immediately.
