

Modules of the start package

DESADV	Receiving and processing of electronic delivery notes (DESADV), sent by Gerry Weber. The delivery notes contain serialized item data in the form of an EPC (Electronic Product Code).
Goods Inbound Verification	Review of registered goods inbound data, based on a target list (DESADV). It can be easily recognized, whether a delivery contains incorrect products or items are missing.
Inventory Verification	Review of registered inventory data based on a target list. The currently registered inventory is compared with the system's inventory.
INVRPT	Processing and sending of electronic inventory reports (INVRPT) to Gerry Weber. The inventory reports include serialized stock data.
Reports	Provides an overview of all goods inbound and inventory data as a browser application.
Database	Database at the shop for the storage of all data from connected modules and of stock and event data.

All modules of the solution **detego® SUITE** are available 'out-of-the-box', freely combinable and can be customized.

Upgrades

You can combine the RFID Starter Kit with one or several of our modules from the **detego® SUITE**:

RFID Starter Kit Gerry Weber

RFID Starter Kit Gerry Weber

As well as in all “Houses of Gerry Weber” the RFID Starter Kit now provides for your shop an improved inventory management and reliable theft protection with efficient processes.

Get into RFID-based inventory management, easy and affordable!

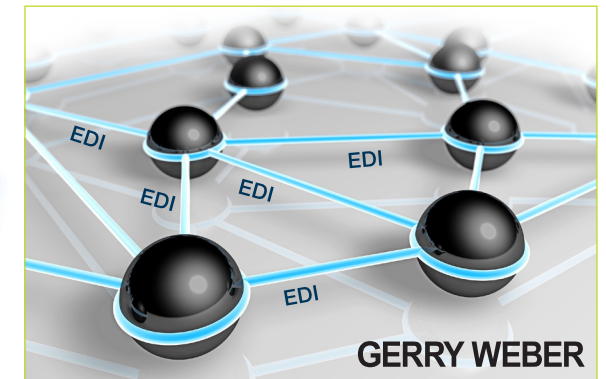

Your benefits

- ▶ RFID improves the transparency and accuracy of the stocks, and hence leads to increased sales.
- ▶ RFID helps to avoid redundant work steps, to recognize wrong deliveries and to realize a cross-company asset tracking.
- ▶ Thanks to an enhanced relationship between supplier and retailer you can increase your sales floor efficiency.
- ▶ Due to the reduction of out-of-stock situations, you increase customer satisfaction.
- ▶ Expand your activities and integrate other suppliers as required for RFID application.

1.400,- Euro for

1. Goods Inbound Verification
2. Inventory Verification
3. EDI (DESADV & INVRPT)
