detego You-R OPEN

**RF-iT**™  
Solutions

# Efficient System Integration

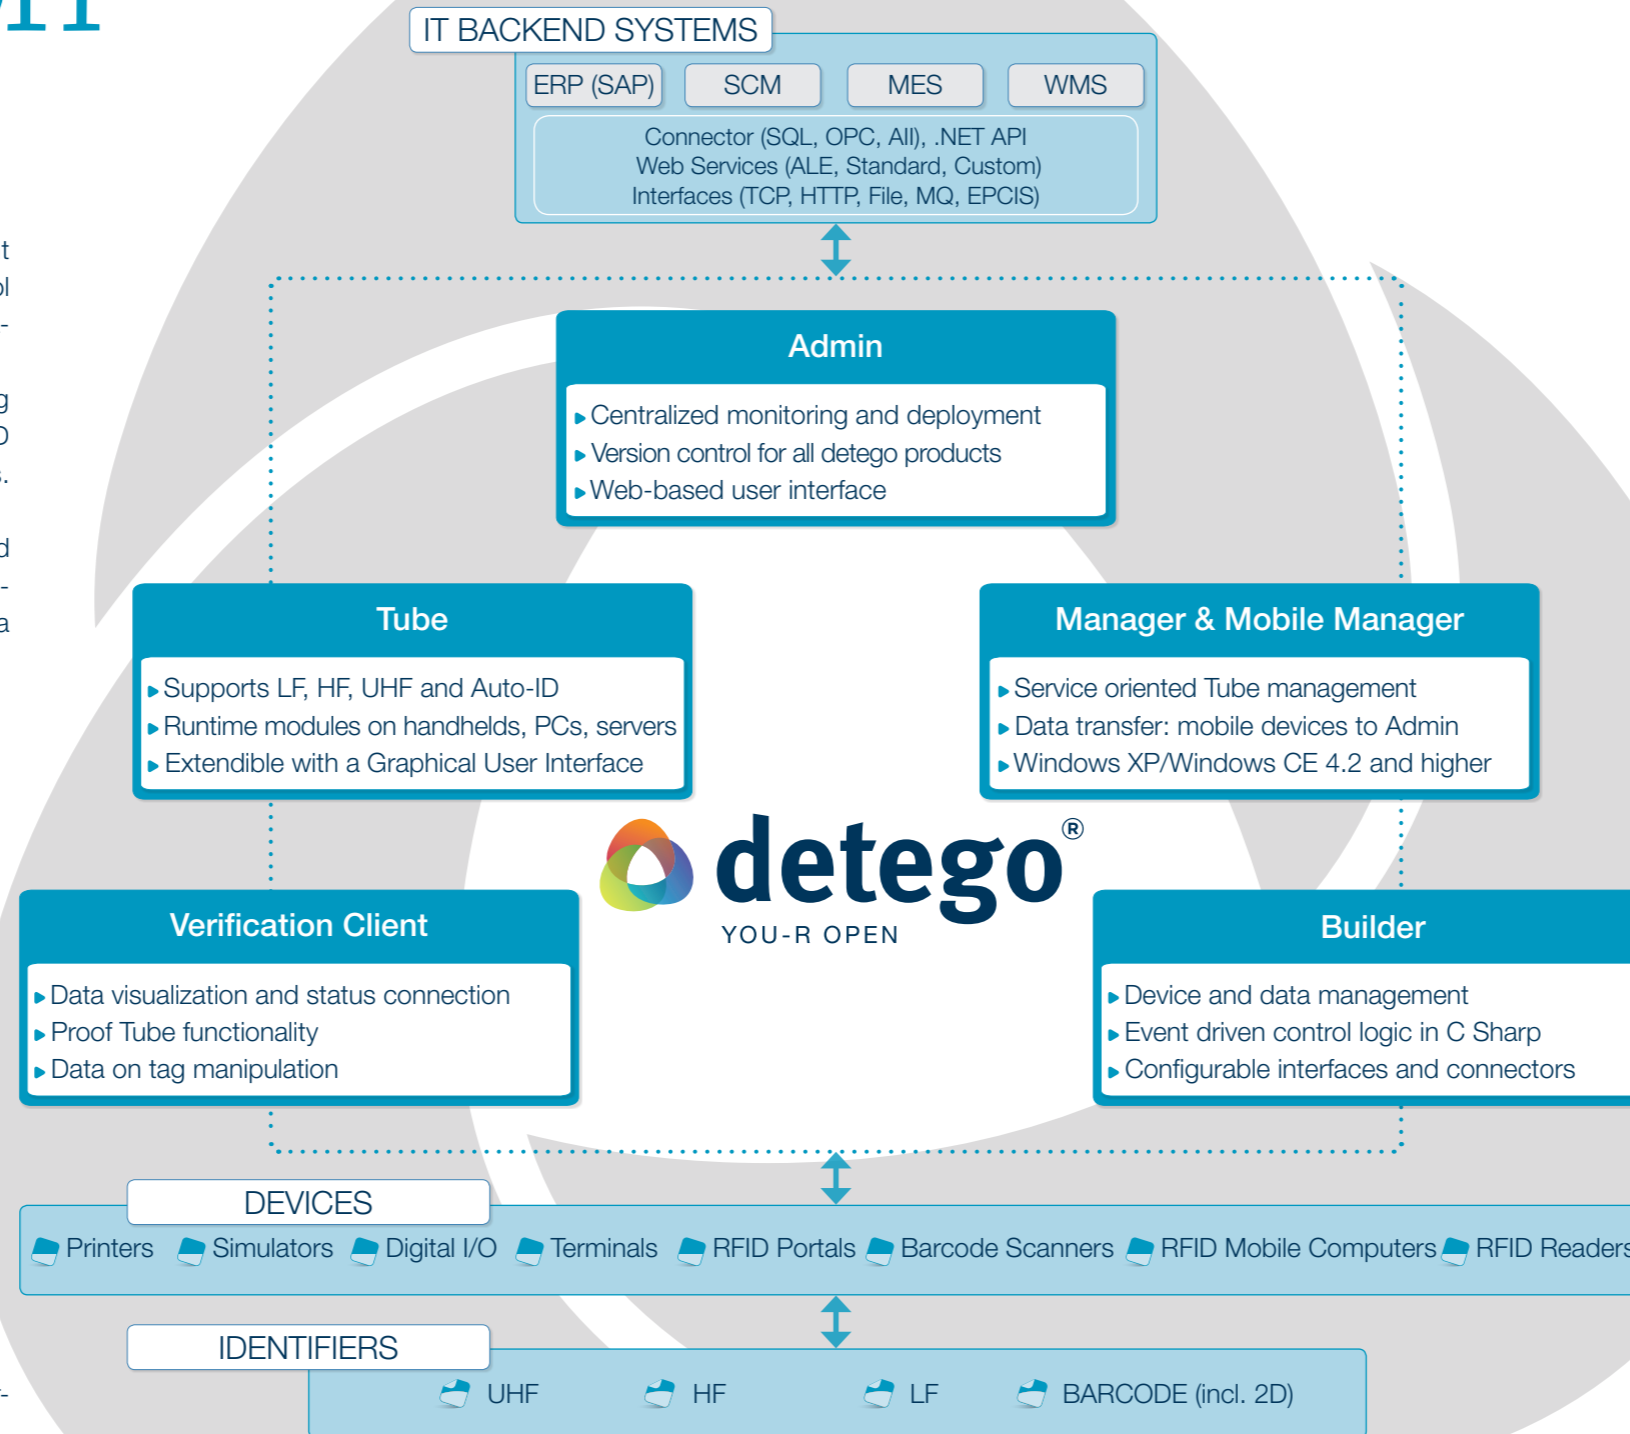

## detego® You-R OPEN

detego® You-R OPEN is your advanced development platform that allows you to connect, configure and control a wide range of Auto-ID devices and interfaces to a database or an Enterprise Application (e.g. SAP). Most of the leading devices are supported including barcode scanners, mobile computers, printers, RFID (Radio Frequency Identification) readers and I/O devices.

It includes a library of preconfigured templates (referred to as Tubes), an Admin environment (for managing devices), a Builder (for developing new solutions) and a Verification Client (for testing).

## Plug & Trace For your RFID and Auto-ID solutions

- ▶ **Out-of-the-box:** basic solution modules
- ▶ **Intelligent Admin:** centralized administration, monitoring and deployment
- ▶ **Easy to implement:** connect, configure, control a wide range of RFID/Auto-ID devices
- ▶ **Proven:** tried and tested on many 'real life' projects
- ▶ **Scalable:** equally suitable for pilot projects or large-scale roll outs

## Your detego® operating environment

detego® You-R OPEN provides a cost-effective software backbone that allows system integrators to deliver a wide range of barcode and RFID solutions – out-of-the-box. The Tube libraries and market-specific versions enable systems integrators to develop 'repeatable' solutions with minimal configuration effort – saving time and money.

RF-iT Solutions is certified partner of Microsoft and SAP and official solution provider of GS1.

## About us

RF-iT Solutions GmbH stands for expert consulting, successful project implementation and the development of advanced RFID solution modules. As the developer of the leading RFID platform detego<sup>®</sup> You-R OPEN and a leading European provider of integrated RFID solutions, we offer with **detego<sup>®</sup>** standard modules for the optimization of business processes. At the same time, we focus our research and development capabilities continuously on innovative technologies in the Auto-ID field, to create a clear value for our customers.

Since our founding in 2005, we witnessed a steady growth and have gained many new partners, employees and customers. Headquartered in Graz, where we are operating the RFID/EPCglobal Test CENTER, we are represented by branches in Germany, France and the UK.
