

Plug & Trace

RF-iT™
Solutions

Plug & Trace

Lengthy, complex and expensive technology projects belong to the past! With the flexible modules of **detego® SUITE**, we guarantee safety, competitiveness and cost effectiveness for your business.

The **detego® SUITE** is based entirely on proven standards to ensure a rapid and smooth integration into existing IT environments with maximum flexibility. All modules are completely independent of each other and can be used in any combination. Other modules can be easily added to the overall structure like building blocks.

The consistent implementation of this modular concept allows a flexible and quick response to new demands in automation. The optimization of new processes is always guaranteed. With the **detego® SUITE** you will always remain on the level of latest technological developments.

Production

Process optimization at the source!

Production process modules include **goods in, progress control, picking** or **goods out** that enable you to optimize your processes. Through automated **tracking & tracing**, accurate tracking of items in the production process is possible. This gives you a clear advantage in terms of speed, accuracy and a significant gain for the quality of your processes.

Distribution

Complete transparency within the supply chain!

With the modules **goods store, goods transfer** and **goods out** an accurate and complete view on the flow of goods is possible. In your warehouses you can achieve a maximum transparency with **detego®** modules. Counting processes and manual controls belong to the past, and efficient cross-docking processes can be realized.

Additional modules can be found in **detego® SUITE** catalog.

detego® is synonymous with leading RFID solutions along the entire supply chain and sets standards in terms of flexibility, scalability, technology and functionality. The **detego**® **SUITE** includes versatile modules for production, distribution and shop as well as professional services for RFID and Auto ID.

Within the **detego**® **SUITE**, the RFID platform You-R® OPEN provides vendor-independent integration of readers, connectors and interfaces, a substantial advantage for optimizing and automating business processes. Additionally, the high performance administration tool supports the operator by a central administration and configuration of the entire IT landscape.

All modules of the solution **detego**® **SUITE** are available “out-of-the-box”, freely combinable and can be customized. Individual modules can be easily replaced or supplemented if requirements change. Therefore, business processes along the supply chain can quickly, efficiently and comprehensively be mapped and optimized, hence ensuring an impressive ROI.

Shop

Finally, correct inventory data!

Faster and more accurate processes can be achieved with the modules of the **detego**® **SUITE** such as **goods in, mobile inventory, goods transfer** and **check out**.

Thanks to a high level transparency in merchandise management, you can manage your shop optimally. Moreover you can generate added value with modules such as **replenishment, article surveillance** and **price reduction**.

Services

Added value thanks to comprehensive services!

The modules from the **detego**® **SUITE** are complemented by professional services. These include technology and process consulting, installation, customer service and support, project management, training and documentation.

Our team of technology specialists and industry experts will advise you in detail about the necessary preconditions and framework for the sustainable use of the modules from the **detego**® **SUITE**. A smooth operation is ensured by our qualified customer support team.
